Cost Optimization+

Environment sprawl? Company growth outpacing cloud governance? We get it. Cloud capabilities are exciting and the focus on what's possible in the cloud can often lead to a situation where your costs have grown larger than you anticipated, and you need the peace of mind that you're making the most of your investment.

Regardless of *how* you got here, the good news is that Protagona's approach to **Cost Optimization+** can help, by providing:

Cost Pressure Relief	• Assess existing environment, spend, consumption patterns • Identify quick-wins to deliver early, actionable cost relief • Maximize spend with minimal disruption to existing delivery operations and routines • Relieve immediate cost pressures without impacting customer's delivery pipeline	**1-2 Weeks**
Sustainable Automation	• Tagging within CI/CD pipelines to ensure continuous visibility and cost attribution • New feature and product development flows into existing visualizations, dashboards and alerting, and threshold logic • Automation ensures ongoing adherence to cost monitoring framework	**4-12 Weeks**
Insight Enablement	• Layering organization and process-related detail to drive visualizations unique to your environment • Actionable insights related to your cloud spend and empowerment to manage spend with confidence • Awareness of trends that represent opportunities or risks to your cloud spend	**2-6 Weeks**

Description of Activities

Kickoff
Team introductions and a review of the schedule, deliverables, and expectations for the engagement

Cost Attribution Workshop
Identify desired levels of cost visibility and target outcomes for each group in the organization

AWS Spend Analysis & Remediation
Assess current AWS environment and identify quick wins to reduce spend based on usage and best practices for optimization

Automation Pipeline Integration
Create or adapt existing automation pipeline to codify cost remediation steps to ensure continued savings moving forward

Visualization and Alerting
Dashboards and alerts to visualize spending trends and TCO based on use cases identified in the Cost Attribution Workshop

Wrap-up & Handoff
Review of all deliverables, documentation, and next steps

Engaging Protagona

How to Get Started
Contact us at info@protagona.com

Protagona will
• Coordinate with you around pre-review discovery, scheduling and logistics
• Require access to key personnel and AWS accounts in scope for the Cloud Optimization+ engagement

Protagona Team Structure
• 1 AWS-Certified Cloud Architect
• 1-2 AWS-Certified DevOps Engineers
