Are You Well-Architected?

No matter where you find yourself on the cloud journey, an **AWS Well-Architected Review** is always a good idea. You'll come away from your review knowing how closely you are following the Well-Architected Framework best practices. When High Risk Items (HRIs) are identified, we'll help you close as many as we can, and we'll provide actionable next steps to close any that remain. Simple as that.

More about AWS Well-Architected Review

WHO
To maximize the value of your **Well-Architected Review**, your team will bring a mix of internal business and IT stakeholders to the table. It's important to include all key stakeholders that are involved with the workload, as High Risk Items (HRIs) may require deeper discussions.

WHAT
Our AWS-Certified Cloud Architect will assess your workload against the Well-Architected Framework's **Six Pillars:**

Performance Efficiency | Cost Optimization | Security | Reliability | Sustainability | Operational Excellence

We will work to remediate as many identified HRIs as possible during the engagement. At the end of the engagement, you'll receive a report that details completed and possible future remediations to optimize your workload and integrate best practices going forward.

WHY
The **Well-Architected Review** will benchmark your workload against AWS' Well-Architected Framework, the gold standard of best practices and design patterns in cloud architecture. Not only will your review provide a clear path toward optimizing your existing workload, but you will also come away from the engagement well-equipped to apply the Framework's principles and best practices point-forward in your organization.

WHEN
Typically, a **Well-Architected Review** can be completed in one to two weeks. Below is representative view of the activities involved, and which of those activities will require participation from your key stakeholders.

Activity	Protagona / Your Team
Kickoff (0.5 hrs)	
Initial Review (1-2 hrs)	
Architecture Review (2-4 hrs)	
Document Findings (1-2 hrs)	
Present HRI Findings (1 hr)	
Remediate 45% of HRIs (2-4 hrs)	
Next Steps & AWS Credits (0.5 hrs)
